ATUL YADO

Cybersecurity Internship Candidate | Computer Science Student

Nakhon Pathom, Thailand | atulyado198@gmail.com

github.com/atulyado linkedin.com/in/atul-yado

SUMMARY

Computer Science student at Mahidol University seeking a cybersecurity internship. Hands-on projects in web application security, network traffic analysis, and Python. Able to explain a vulnerability, demonstrate its impact in a local lab, and verify the fix with tests.

SECURITY PROJECTS

SQL Injection: Attack, Fix, Verify

Node.js | Express | SQLite | 2026

- Demonstrated a login bypass in a deliberately vulnerable local app and compared it with a parameterized query and bcrypt password check.
- Wrote three HTTP tests covering the bypass, secure rejection, and successful normal login; documented the finding and remediation.

Packet Sniffer

Python | Scapy | 2026

- Captured and logged TCP, UDP, and ICMP packet details including source, destination, protocol, and timestamp.
- Implemented protocol filters and a simple alert when one source IP sends many packets in a short period.

Social Media Bot Detection

Python | Machine Learning | 2026

- Explored a 5,105-account labeled dataset and compared baseline and ensemble classifiers for bot versus human detection.

TECHNICAL SKILLS

Security: application security, SQL injection, packet analysis, Wireshark, Burp Suite, Nmap
Programming and tools: Python, JavaScript / Node.js, SQL, Scapy, SQLite, Git, C / C++

EDUCATION

Bachelor of Science in Computer Science

Mahidol University, Thailand

EXPERIENCE

Student Apprentice - Warehouse / Store Department

Apr-May 2023

Indorama Polyester Industries PCL, Thailand

SELECTED TRAINING

Cisco Networking Academy - Introduction to Cybersecurity, course completion (May 2026)

AWS Training & Certification - AWS Cloud Practitioner Essentials, course completion (Jun 2026)

TryHackMe - Hacker Holidays, completion (Aug 2026)
